

Data Requirements	Gateway West	Idaho to NW	LS Power SWIP	Gateway South	Transwest Express	MSTI
Project Description						
Physical Location						
Voltage (Kv)						
Scheduled Completion Date						
Cost Benefit Analysis						
Investors (description & Interst)						
Operator						
Subscribers/Contracts						
Pertinent transmission study results						

Data Requirements	Gateway West	Idaho to NW	LS Power SWIP	Gateway South	Transwest Express	MSTI
Copy of any WECC economic/reliability determinations						
Proposed siting process						
Proposed cost allocation						
Proposed cost recovery						
Risk/benefit analysis (focused on distribution of costs, benefits, risks among the parties proposed to share in the cost allocation)						
Proposal on dealing with cost overruns						

Data Requirements	Gateway West	Idaho to NW	LS Power SWIP	Gateway South	Transwest Express	MSTI
Degree of consensus among stakeholders on above						
Describe how each NTTG cost allocation principle was applied in the analysis						
Description of any regulatory rulings needed prior to the examination of the project						
Any NTTG Planning Committee analysis pertinent to the project						
Description of how the project fits into the NTTG Biennial plan						
Description of any proprietary or commercially sensitive information applicants believe should remain confidential during the
